SUMMARY

Since 2014, IAGA Division VI (formerly IAGA WG II.1) has its own website (www.emiw.org) with the possibility to register as a member of our division. This membership database serves as the backbone of our mailing list and the entire registration process for our biennial Electromagnetic Induction Workshops. We currently have over 800 members from nearly 60 countries.

Apart from this basic number, we can provide statistics showing the evolution of our membership structure in terms of number, nationality, gender, etc. Our poster gives an overview and will be the prelude to repeated presentations during our future workshops to illustrate and monitor our activities as an IAGA Division.

Keywords: Statistics, IAGA Division VI members, Diversity
